Corporate environmental management and voluntary actions can trigger innovation in companies allowing to achieve competitive position thanks to product or process innovations. More recently, voluntary instruments have been identified as key tools to support the transition toward a circular economy. This Special Issue invites authors to contribute in the following fields (non-exhaustive list):

The role of EMAS in the transition to a circular economy and in the pursuing of organisations competitiveness;

Circular Green Public Procurement;

Green corporate procurement toward circular economy;

LCA (Life Cycle Assessment) and PEF (Product Environmental Footprint) as tools to improve the product “circularity” and competitiveness;

Ecolabels & circular economy, ecolabels & competitiveness;

Environmental Technology Verification experiences;

Networking experiences to boost voluntary tools and circular economy;

Voluntary environmental management initiatives in cluster of SMEs and Eco-industrial parks.
