### Message from the Guest Editors

This special issue of *Sustainability* titled “**Cross-fertilized fields of knowledge and sustainable development goals (SDGs)**” will focus especially on how practical and theoretical approaches rooted in the social; educational; economic and natural sciences create cross-disciplinary areas of investigation and technological advance.

The contributions are expected to nourish the thinking of a vast public; from researchers and students to ordinary citizens; towards large-scale transitions caused by global change and development; remediating disruption and disorientation for humanity.
