Dear Colleagues,

The New Agenda for Culture published in May 2018 by the European Commission embraces an innovative approach to the role of culture in the creation of social and economic value. In particular, it recognizes the importance of the relation between cultural production and participation, on the one side, and health and wellbeing, social cohesion, and innovation, on the other. Moreover, the Agenda also contemplates the possibility of other, significant possible forms of cultural crossovers that are not explicitly mentioned in the Agenda. Possible examples are environmental sustainability and education and lifelong learning, among many.
