Message from the Guest Editors

Dear Colleagues,

The purpose of this Special Issue is to undermine the current issues in sustainable energy production. For that, multidimensional factors of balanced scorecard entitled financial, customer, internal, and competitive perspectives are considered so as to discuss the effectiveness of energy production for sustainable economic growth. The novelties of this Issue are to provide a multidimensional outlook to the energy industry, and to give specific cases for developed and developing countries to illustrate the policy recommendations of sustainable energy economics.
