Message from the Guest Editors

Dear Colleagues,

Dairy production systems are highly diverse between and within countries and regions. These production systems can be categorized by different variables, such as confinement or grazing outdoors, high output or low output, conventional or organic, and extensive or intensive.

Dairy farmers are facing a number of challenges today. Demands for a lower environmental impact, more animal welfare, and less intensive production need to be balanced with the pressures from market liberalization and the achievement of adequate income for producers. Given the social, economic, and environmental performance of dairy production in the different countries and regions, the shift towards more sustainable systems is a key challenge. In this regard, both sectoral and territorial perspectives are relevant to develop integrated solutions for a future-proof dairy production. This requires farmers to assess their resource dependencies and vulnerabilities, to explore market opportunities, and to identify roles to be played by other partners in the dairy value chains.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
