Message from the Guest Editors

Data are recognized as a key element for the realization of scientific administration and effective decision-making in government. Governments around the world are pushing data policies to enhance the country.

This Special Issue discusses various theoretical and practical topics for the establishment and realization of sustainable data policies in the public sectors. It covers major issues related to data governance, such as technological elements and application plans necessary to realize a data-driven government such as artificial intelligence, big data, and data science, laws and systems, open data and their disclosure, data-driven public services, and privacy issues.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
