The Future of Design for Sustainability

Message from the Guest Editors

Today, the health of both our environment and our societies is at a critical state, at a breaking point, with piecemeal solutions offered as social-media-friendly rallying points. It can be argued that the awareness of the concept of sustainability and the need to reduce our negative impact upon the environment and society has grown significantly and, consequently, has moved up the global agenda.

This Special Issue of *Sustainability* is seeking papers that push the frontier of what design for sustainability could be—and possibly *should* be—across the broad spectrum of design disciplines, including product design, user experience design, service design, etc. In particular, we invite manuscripts that question and offer alternatives to the current thinking, strategies, and directions.
Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2018).
