submissions:

1 December 2021

Message from the Guest Editor

This Special Issue focuses on both in situ methods of landscape quality analysis and methods based on the application of so-called landscape-based surrogates. The first approach explores issues such as the impact of the water and soil quality, biodiversity, and ecological processes on the functioning of the nature at the landscape scale. The second approach deals with the application of measurement indirectly testifying on the LEQ and includes the application of geomorphometric indicators, measurements based on the spectral variability and landscape metrics.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
