### Message from the Guest Editor

Sustainable investment and socially responsible investment have become a major issue for investors around the world. Investors have realized that they can make a difference in environmental, social, and governance (ESG) through their habits. This not only forces an adjustment of habits on the financial markets, but also an adaptation of managerial practices in companies. The purpose of this Special Issue is to report on this trend. Through articles of high scientific value, we would like to evaluate the moderating role of ESG on investment and finance.

The issue will be of interest to academics, practitioners, policy-makers, and by extension, the whole finance community.
