Deadline for manuscript  
submissions:

**closed (31 March 2022)**

### Message from the Guest Editors

Renewable energy sources, mainly solar and wind, are presented as protagonists and have had impressive growth. Beyond the obvious benefits of generation, there are some challenges that the intermittent nature of these sources brings up. Considering this, energy storage is shown to be a vital technology in order to integrate this renewable generation better, whether centralized or distributed, ensuring an increase in power systems performance and other benefits that reach various stakeholders of the electric grid.

On the other hand, the large insertion of energy storage technologies, such as batteries, which require an AC/DC conversion interface with the power grid, directly affects the waveform distortions, mainly as sources of harmonic distortions. Distortions of the waveform cause a series of negative effects on networks at different levels, and cannot be neglected. In addition, there are other problems such as voltage unbalance and voltage fluctuation. Therefore, this Special Issue aims to receive articles highlighting the challenges and benefits that energy storage systems (ESSs) have in power systems.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
