### Message from the Guest Editor

Dear Colleagues,

Further to the success of the Special Issue of Sustainability on “E-Commerce and Sustainability”, we are delighted to open a new Special Issue entitled “E-Commerce and Sustainability (Second Volume).”

Deadline for manuscript  
submissions:

**closed (31 March 2023)**

E-commerce continues to grow globally with every passing year, so examining how sustainable it is as a practice and as a new form of doing business is becoming increasingly important. Economic growth is inextricably linked to sustainability, as is economic efficiency, and the only way to make sure that e-businesses are sustainable and contribute to the development of a sustainable society is by ensuring that their economic growth practices serve to protect and restore the environment and the ecosystems around us. Several aspects are involved in this that must be examined.

The main objective of this Special Issue is to explore the emerging technologies and trends for e-commerce and support e-businesses’ sustainable growth. This Special Issue aims to discuss the link between sustainability and e-business from theoretical, methodological, and disciplinary perspectives.
