Department of Evolutive Biology, Ecology and Environmental Sciences, University of Barcelona, Diagonal, 643, 08028 Barcelona, Spain

Deadline for manuscript submissions:

closed (31 July 2021)

Message from the Guest Editors

Our proposal for this SI is to focus on four areas, the socio-economy, climate, energy and environment, and, using the available data and models, suggest new scenarios and/or adaptations of the existing ones based on what we have observed these last months.

In terms of socio-economy, manuscripts that address post-Keynesian approaches, particularly ones that aim to guide in-depth socio-economic transformations, will be considered. In the area of energy, we welcome studies analyzing the energy transition to renewable energy sources together with the impacts that this transition could have on climate change and the environment. In terms of climate, papers analyzing the effects that climate change could have on environmental degradation or on the efficient implementation of renewable energy sources are especially encouraged. Finally, our consideration of the environment will be devoted to the impacts that human activities (particularly those derived from sustainable development strategies) have (and will have) on the Earth's ecosystems (both land and ocean), and how this could evolve in the future.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
