### Message from the Guest Editor

Dear Colleagues,

In recent years, the EU established important climate policy objectives to be reached by Member states to decarbonize its economy and foster a clean energy transition. Cost-effective solutions are needed in all sectors, to reduce fuel poverty, increase security of energy supplies, reduce dependence on energy imports, favor economic growth and job creation, and generate environmental and health benefits. To reach this challenging objective, governance and regulatory frameworks should favor a decentralized and proactive citizen-oriented organization of the energy sector and society as a whole. A strong effort is required to forge new paradigms of urban development and innovative partnerships to ensure that benefits are inclusive and fully shared. The Special Issue will investigate potential technical, economic, and social benefits, and related policy and regulatory implications, of this transition.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
