### Message from the Guest Editors

The purpose of this Special Issue is to set a discussion on how to make explicit and expand this cultural side of EIA. Both conceptual and case-based papers are welcome. Examples of contents include but are not limited to:

- Cultural lessons we may learn from the EIA procedure;
- Case studies on the ethical dimensions of EIA;
- Cultural traditions that may provide inspiration to enhance the EIA procedure;
- Cultural views on EIA practices.

This Special Issue will contribute to an integrated understanding of the importance EIA has in current societies. Complementing technical knowledge with a humanistic perspective is key for researchers and practitioners to understand and perform EIA in a holistic way that maximizes the full potential of this procedure as a tool for sustainability.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
