Message from the Guest Editors

Dear Colleagues,

Activities such as mining, use of fossil fuels, intensified agriculture, industrial waste discharges, and urbanization have been developing without control in many parts of the planet, contributing significantly to the deterioration of ecosystems and human health and causing many sustainability problems. Therefore, a good diagnosis of an environmental problem will serve as support to propose sustainable and viable environmental remediation strategies.

This Special Issue aims to present innovative research on environmental chemistry, as well as the implementation of sustainable technologies for the remediation of environmental matrices and new strategies for the recovery of waste. Topics include but are not limited to the following:

Environmental monitoring;

Environmental pollution and toxicology;

Environmental pollution and climate change;

Sustainability in environmental remediation;

Innovations in water and wastewater treatment;

Valuation of agro-industrial waste;

Application of advanced oxidation processes degradation of organic compounds;

Prof. Dr. Hugo Saldarriaga Noreña

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
