### Message from the Guest Editors

The Special Issue “Dealing with environmental conflicts” calls for contributions that address how we can better understand the environmental conflict management and resolution. Contributors have to consider global, regional and local scale, and they are welcome to examine the drivers and/or proposing concrete solutions for environmental conflicts resolution.

Of particular interest are papers that (i) point out the conflictual dimension of different new societal tasks; (ii) present local and regional experience related with environmental conflicts; (iii) propose different innovative methods to understand environmental conflicts; (iv) demonstrate solutions that are scalable, transferable, and/or can be tailored to specific local or issue-dependent needs in their implementation, and (v) provide a better understanding of social and economic dimension of environmental conflicts.
