### Message from the Guest Editors

Dear Colleagues,

The role played by environmental education, or education for sustainable development, as many call it, in pursuing and achieving sustainable development, is an important one. Environmental education encompasses education for, through and about the environment, with the ultimate aim of, not only leading to short-term, but to long-lasting, awareness, changes in behaviors and in lifestyles, which, combined, may lead towards a more sustainable world. In this context, it entails aspects as varied as curriculum development and planning, pre-service and in-service teacher education, content development and a healthy combination of theoretical teaching and field work.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
