Message from the Guest Editor

From local communities to national citizens to global agreements, there is a complex interplay between natural and social processes. In unison, these interacting forces determine our future sustainability. Addressing global issues of climate change, biodiversity loss, ocean pollution, or systemic environmental injustice feels overwhelming, so people frequently decide to take local actions to promote sustainability.

This Special Issue will explore the complex interplay between sustainability actions at the local-to-global scale. From this geographic perspective, these articles will provide interdisciplinary examples of how people take local and regional action to address national and global sustainability issues.

Authors are invited to submit high-quality original manuscripts that explore these topics through case studies, current research reviews, evidence-based experiences, or applied analysis of relevant local-to-global sustainability actions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
