Deadline for manuscript
submissions:

15 March 2022

Message from the Guest Editors

This Special Issue aims to focus on recent advances in research on environmental behaviors of natural and engineered nanoparticles. This mainly includes the adsorption, desorption, and interaction between natural and engineered nanoparticles and contaminants. High-quality original research papers on these topics will be welcomed, which may reflect both technical advances and innovations with respect to the environmental behaviors of nanoparticles, including eco-toxicology of nanoparticle–contaminant complexes and nanoparticles. The investigation of interactions between natural nanoparticles (e.g., dissolved organic matter, humic substance, super-biomolecule) and contaminants is also encouraged, especially in aquatic systems. Review articles which describe the current state of research on the environmental behaviors of nanoparticles and risk assessments of nanoparticles are also welcome.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
