Message from the Guest Editors

Dear Colleagues,

In tumultuous times, how to maintain sustainable, equitable, and resilient delta systems that can continue to generate social and economic prosperity and flourishing biodiversity in support of local communities and wider society is critical. Arguably, this requires adaptive and transformational environmental policies and governance to be put in place. Understanding how to develop transformational environmental policies and governance to steer delta systems along a sustainable trajectory remains a crucial evidence gap to be bridged.

In this Special Issue, we are therefore concerned to focus on publishing original research articles that address how environmental policies can positively contribute to enhancing and supporting the sustainability of coastal delta systems, with a particular focus on: environmental governance; sustainable transformation of delta systems; biodiversity conservation; nature-based solutions; adaptive and thriving communities under uncertainty; collective action and innovation; inequalities and gendered vulnerabilities; delta voices, cultures, heritage, and indigenous communities.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
