Deadline for manuscript  
submissions:

**closed (15 March 2022)**

### Message from the Guest Editors

The transformation of our economies toward low environmental impacts and circular solutions is on the way. Packaging is at the center of discussion, mainly in the context of the requirements of the circular economy and carbon footprint reduction.

Assessment of environmental sustainability of packaging includes all the above mentioned topics but must include further issues, such as food/product loss and waste, littering, effects on biodiversity and other factors as well to come to an overall assessment. Methods to expand life cycle assessment and recyclability testing for packaging are currently being developed, but there are no generally accepted approaches available at the moment.

This Special Issue aims to collect research papers which examine how these divergent issues could be addressed, in the context of sustainability assessment of packaging to create the methodology as a basis for better environmental decisions. The focus will be on assessment methods concerning sustainability of packaging. The research papers should report the theoretical background, methodology, results, analysis, and implications for applications of the outcomes to have a meaningful impact.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
