Message from the Guest Editors

This Special Issue aims to address the different ethical questions raised by climate adaptation from a multidisciplinary angle. We especially welcome papers on the following topics:

- The inclusion and exclusion of specific social groups in climate politics;
- The designation of responsibilities to actors regarding climate adaptation and resilience policies;
- Scalar politics in climate adaptation policy, as climate change issues transcend geographical, administrative, and temporal scales;
- The conceptual and/or empirical influence of resilience studies on climate adaptation policies and the impact of social justice;
- Questions of epistemic justice and the role of local knowledge in climate adaptation and resilience policies;
- Quantitative approaches that allow for modelling ethical considerations in climate adaptation and resilience policies.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
