

Feature Paper on Sustainability Wastewater Management

Guest Editors:

Prof. Dr. Dariusz Młyński

Department of Sanitary Engineering and Water Management, Faculty of Environmental Engineering and Geodesy, The University of Agriculture in Krakow, 30-059 Krakow, Poland

Dr. Piotr Bugajski

Department of Sanitary Engineering and Water Management, University of Agriculture in Krakow, Mickiewicz Ave. 24/28, 30-059 Krakow, Poland

Deadline for manuscript submissions:

closed (30 November 2021)

Message from the Guest Editors

Dear Colleagues,

The water deficit present on all continents of the globe is and will be in the near future the main factor of the slowdown of economic development in all countries of the world. In addition, the water that is currently in the world is polluted to a large extent through the development of human civilization. Currently, developing countries have problems with wastewater treatment processes from various branches of the economy, which have already been diagnosed and eliminated in highly developed countries. The possibility of getting acquainted with such solutions through insight into scientific publications in the field of water and wastewater management will allow the implementation of these experiences in areas where these problems arise. Generally, every action of mankind to improve the quality of water will result in the improvement of the well-being of people and their future generations.

Supported by the 2nd International Scientific Conference on Ecological and Environmental Engineering Conference (30 June–2 July 2021, <https://coee.urk.edu.pl/>).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
