Message from the Guest Editors

Dear Colleagues,

The existing food and farming system contributes toward huge food waste and degradation of natural resources, i.e. land, water, and soil. Recently, there has been significant worldwide movement, driven by the Ellen MacArthur Foundation, to develop circular economy (CE) frameworks for various sectors, including food. However, CE cannot be accomplished merely by introducing recycling or recovery operations in parts of the system. A drastic alteration is urgently needed across the system to ensure that it fits the purpose for the future.

This Special Issue aims to push research on food sustainability and CE forward and toward new directions. We invite manuscripts that critically examine how digital technologies and advanced scientific and technological innovations can enable circularity. These topics include but are not limited to:

- Food system re-design based on CE principles;
- Food waste valorization, recovery and reuse;
- Life cycle assessment-driven minimization of food waste;
- Digital infrastructure and CE in food.

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
