submissions:

30 June 2022

Message from the Guest Editor

Forests' importance in the urban environment is obvious in creating biodiversity, providing economic and environmental services, such as elevating property values, and in reducing green gases and aerosol. Today, research is focusing on the importance of monitoring urban and peri-urban forest stress for sustainable benefits. Monitoring efforts are focused on direct and indirect stressors, such as forest utilization or land use changes, climate change, air pollution, and globalization, which in turn may bring about an additional impact from invasive species.

Moreover, decision makers rely heavily on advanced tools to improve their management of forests in a very complex texture, such as an urban or peri-urban environment. These tools vary from standalone tools such as remote sensing for monitoring land cover change to combinations of different technologies, such as decision support systems, including scenarios and modeling.

This Special Issue calls for original outcomes from research activities and aims to publish innovative approaches that promote sustainable forest covers in urban and peri-urban forests.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
