The Impact of AI on Sustainable Development of Smart Tourism and Destination Marketing

Message from the Guest Editors

There are new prospects for smart tourism and smart destination marketing owing to the rise of AI-powered language models like ChatGPT. In addition to helping tourists plan their trips, offering personalized recommendations, content creation, and customer services, and also reviewing behavior, these technologies can also be used to gather and analyze information on travelers' point of interests and travel habits for use in decision-making. Travelers can benefit from ChatGPT in a number of ways, including personalized travel itinerary suggestions, information about nearby sights and activities, and real-time language translations. These features can improve tourists' overall tourism experiences and make their trips more usefulness and ease of use and enjoyment.
Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
