Message from the Guest Editors

Dear Colleagues,

Nature conservation worldwide has been shifting from separating “wilderness” from people to more inclusive approaches of win–win for both nature and humans since the 1980s. This evolution of approaches that involve communities and local people in protection strategies has paralleled new understanding of the dynamics of ecology, where nature is more recognised to be dynamic, changing, and with man a part of, not separate from, an integrated whole (Botkin 1990).

Community-based conservation thus emerges and spans a wide range of approaches that share the dual belief that the involvement of communities living in national parks and reserves is both ethnically fair and ecologically effective. The conventional “Yellowstone model” growing out of the national park system of the United States is considered unsuitable for inhabited landscapes, and traditional and local societies are becoming the solution to conservation instead of being the problem.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
