With climate change, pandemics, pollution, and energy scarcity overwhelming urban ecosystems, we need to question how citizens can not only stay comfortable, but also thermally safe and healthy over the coming decades. Likewise, given the current and potential future global disease crises, it is more necessary than ever to ensure safe indoor and outdoor environments (pollution-free, energy reliable and with thermal comfort), especially for the most vulnerable (aged population, children, impoverished sectors, etc.). Cities play a key role in dealing with diseases, heat waves, and other stress factors affecting citizens. It appears that with the help of new energy technologies, materials, nature integration, and renewed approaches, it is now possible to implement the capabilities for cities to take the next step. We must question previous approaches and find new answers on integrated strategies for a sustainable evolution of urban environments and the role of the buildings within them.

This Special Issue welcomes original research papers, reviews, and case studies on the topic and short discussions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
