Engineering, The University of  
Seoul, Seoul 02504, Republic of  
Korea

Deadline for manuscript  
submissions:

**closed (31 July 2021)**

### Message from the Guest Editor

Green logistics, which focuses on supply chain management practices and strategies such as transport, material handling, and packaging, is geared towards reducing the energy footprint and environmental damage of freight distribution.

The primary objective of this Special Issue is to gather high-quality research that investigates sustainable logistical operations to provide relevant insights leading to the understanding of environmental implications of sustainable green freight system management. We welcome original research such as reviews or empirical studies employing a variety of methodologies, mathematical modeling, simulation, or behavioral experiments on (but not limited to) the following research areas:

- Sustainability and green product design and packaging;
- Green port management;
- Optimization models for low-carbon emission-aware green freight transport system;
- Green last-mile freight delivery system;
- The implication of green logistics activities on supply chain performance;
- Reverse distribution and green logistics.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
