### Message from the Guest Editors

Several studies and projects that have developed conceptual models and frameworks to build city resilience and form sustainable cities can be found in the literature. These studies aim to define the attributes and actions that need to be implemented in order to improve the resilience of cities. Although theoretical knowledge has been developed with regard to how to build city resilience, the information provided by the existing frameworks has been considered too complex to put into practice in everyday activities. A more detailed guide is needed that helps the crisis managers to implement resilience with concrete actions and processes in the most efficient way. This guide should take into account a holistic approach considering all the stakeholders taking part in the CC-resilience-building process, bearing in mind all the resilience dimensions (infrastructure, social, organizational, governance, economic, and environmental).

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
