Deadline for manuscript  
submissions:

**30 June 2024**

### Message from the Guest Editors

This Special Issue serves as a platform to discuss the phenomenon of cultural landscape resilience and the external pressures connected, among other issues, to climate change. The most pertinent questions to be addressed are as follows: To what extent are the values of cultural landscape able to spontaneously determine its resilience to contemporary transformations? Is landscape resilience possible at all? If so, to what extent and with what tools can it be strengthened? The subject of resilience may refer to various aspects of cultural heritage conservation—environmental aspects such as climate change challenges, as well as legal and spatial/urban planning aspects. The topics considered include, but are not restricted to, reflections on the identification of current problems, and challenges in maintaining and preserving the cultural heritage of cities, villages, open spaces and, in particular, historic gardens. It is also important to pay attention to the integrity of the cultural landscape with the continuation of the activity of its anthropogenic determinant, local biodiversity and environmental conditions.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
