### Message from the Guest Editors

The studies of this special issue are expected to address:

- The source and distribution of heavy metals in the environment (soil, water, air, living organisms, waste).
- The mapping of areas at a global and regional scale where pollution is a high risk.
- The consequences on the environment and food security of heavy metals.
- The relation of trace elements with zero waste strategy and circular economy.
- The sustainable strategies for the remediation of heavy metal pollution.
- The impact of metals in the environmental policy
- Methods to remove and or uptake heavy metals
