Message from the Guest Editor

People and the environment, the physical and the human, are at the core of Sustainability. The overarching scope of this Special Issue (SI) on “Human Geography” brings together all of its subdisciplines by exploring “interrelationships between people, place, and [the] environment, and how these vary spatially and temporally across and between locations” [1]. The five main divisions of human geographical study—economic, cultural, social, political, and historical—reflect the central disciplines with which human geographers interconnect [1–7]. All five remain fundamentally focalized on specific areas of concentration, notably—for example—urban. Human geography refers to the study of people as well as “geographical interpretations of economies, cultural identities, political territories, and societies” [8]. Human beings and their expansiveness to create settlements interplay to innovate and develop a nature-based relationship. This relationship is a balancing act of ethos and science and multidisciplinary as it pertains to the vast array of issues, perspectives, and challenges human beings face [9, 10].

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
