**Dr. Assunta Florenzano**

Laboratory of Palynology and Paleobotany, Department of Life Sciences, University of Modena and Reggio Emilia, Via G. Campi 287, 41125 Modena, Italy

Deadline for manuscript submissions:

**closed (30 September 2018)**

### Message from the Guest Editors

The knowledge of past environmental history strongly contributes to conscious and efficient environment conservation and management. Therefore, the long-term perspective of the dynamics which govern the human-climate ecosystem is becoming one of the main focuses of paramount interest in biological and earth system sciences. Multidisciplinary bio-geo-archaeo investigations on the underlying processes of human impact on landscape are crucial to allow us to envisage possible future scenarios of biosphere responses to global warming and biodiversity losses.

This Special Issue seeks to engage an interdisciplinary dialogue on the dynamic interactions between nature and society, focussing on long-term environmental data as essential tool to better-informed landscape management decisions to gain an equilibrium between conservation and sustainable resources exploitation. Studies on environment, global change, archaeobotany, conservation, cultural landscape and human impact, with special focus on the research carried out by botanists in the different fields, are particularly encouraged.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
