Sustainable Hydrocarbon Processing

Guest Editor:

Dr. Nejat Rahmanian

Department of Chemical Engineering, University of Bradford, BD7 1DP, UK

Deadline for manuscript submissions:

closed (31 December 2021)

Message from the Guest Editor

This Special Issue will address current ongoing research in the oil and gas industry with a focus on sustainability. The current trend shows that fossil fuels play a major role in global warming and climate change. This Special Issue will explore how the current oil and gas processes can be run more sustainably with a low- or zero-carbon footprint. Papers from both academia and industry are welcome. We would like you to submit your research articles and highlight how your work improves the process. Research on the circular economy, reduce, reuse, recycle, and redesign are most welcome.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
