Centre for Research & Technology Hellas (CERTH) / Chemical Process & Energy Resources Institute (CPERI), 4th km Ptolemais - Mpodosakeiou Hospital (Region of Kouri), 502 00 Ptolemais-Hellas, Greece

Dr. Panagiotis Grammelis

Centre for Research & Technology Hellas, Chemical Process and Energy Resources Institute (CERTH/CPERI), 4th km. N.R. Ptolemais-Mpodosakeio, 50200 Ptolemais, Greece

Deadline for manuscript submissions:

15 November 2024

Message from the Guest Editors

Biomass is plant- or animal-based material used for electricity production, heat production, or in various industrial processes. Biomass is converted into usable energy via combustion.

Direct combustion is the most common biomass conversion technology. The development of new technologies will enable the production of secure and sustainable biomass supplies, clean and effective conversion processes, high-quality fuels, and optimally integrated solutions for households, services, industry, and district heating and cooling.

Main research areas:

- Development and demonstration of lowest emission and highest efficiency residential biomass heating systems;
- Development of cost-efficient, sustainable supply of agrobiomass and forest biomass;
- (Thermal) upgrading of biomass to high grade fuels;
- Preparation of solid and recovered fuels and biogas from the biodegradable fraction of waste;
- Development of enhanced concepts for co-utilization biorefineries;
- Development of storage, drying, and logistics of solid biomass fuels and the improvement of its quality;
- Biomass-based hydrogen production via thermo-chemical and bio-chemical/biological hydrogen production pathways.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
