submissions:

31 December 2021

Message from the Guest Editors

Dear Colleagues,

This focus of this Special Issue is on how individuals, organizations, policy-makers, and society at large can harness ICT to promote sustainability. We adopt the triple bottom line approach to sustainability as envisioned in the United Nation's 2030 Agenda for Sustainable Development that sustainability is about the synergy across people, planet, and profit. Accordingly, we conceptualize sustainability as encompassing social, environmental, and economic dimensions.

A specific focus is on green ICT defined as the study, use practice, and design of computing resources efficiently and effectively with minimal or no impact on the environment (e.g., climate change), as well as to promote sustainability-related practices.

We invite a wide array of submissions, from philosophical discourse to empirical study and design works. We encourage discussions on the values and ethics of computing with regard to sustainability goals. Moreover, we are also interested in works related to the role of ICT in sustainable development. Finally, we promote interdisciplinary research on various aspects of computing and ICT design for the purpose of sustainability.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
