Message from the Guest Editor

The main trend of the modern scientific and technical society is the integration of the technosphere, biosphere, and the virtual (digital) world. Digital twins and end-to-end technologies are becoming the drivers of sustainable development. Today, thanks to digitalization, manufacturing systems have not only one but several solutions to meet requirements. In fact, techniques have been modeled and found to guarantee the sustainable development of products, companies, and industries, taking into account a huge number of factors that reduce the impact of uncertainty on business.

For this Special Issue, authors are encouraged to consider how digitalization affects quality of life, what kind of new opportunities, risks, and problems may arise for people, the way the economy will change, the trends of education that will arise, and what kind of specialists will be in demand.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

**Open Access:** — free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and many other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / 2020 CiteScore - Q1 (Geography, Planning and Development)
