Deadline for manuscript
submissions:
closed (30 April 2023)

Message from the Guest Editors

Dear Colleagues,

This special issue focuses on innovation design, knowledge management and design strategies that contribute to the sustainability of society and the achievement of wellbeing.

The call for papers is open to a wide range of papers that promote discussion on: a) the organisation design, b) organisation management, c) economic and business strategy. Also included in this theme are discussions on the implementation of social systems, including business, based on ideas that contribute to the sustainability of society, such as the SDGs, well-being, DX and diverse well fairness discussions.

Papers selected for this special issue will be published following a rigorous peer-review procedure with the aim of ensuring the rapid and widespread dissemination of research results, developments and applications.

With the rapid changes in the social environments due to pandemics, innovation and knowledge management activities required not only conventional approaches but also discontinuous ones. Therefore, submission papers can be newly positioned in discontinuous research areas with novel features, as well as being discussed in the existing knowledge management area.

Special Issue

Editor-in-Chief

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
