Deadline for manuscript  
submissions:

**20 December 2021**

### Message from the Guest Editor

Traditionally, the management of water resources has been considered a topic of natural and technical sciences, such as physics, hydrometeorology, technical hydrology, hydraulics, and water engineering. In developed countries, the need to satisfy a growing demand for hydroenergy and water supply has resulted in big engineering infrastructure waterworks, such as building dams for energy production and water supply, training rivers, and water channels and reclaiming humid areas for agricultural production. Although the topic of water has been recognized as multidisciplinary, until the end of the 20th century, the emphasis was put on hydrotechnical and economic aspects.

This Special Issue aims to bring together critical views, difficulties of interpretation, and need for an improvement of the IWRM concept and also drawbacks and benefits for applying IWRM in the field. Papers on case studies demonstrating how IWRM can be implemented in different socioeconomic environments are welcome.

Deadline for abstracts: October 10, 2020

Decision on abstracts: October 30, 2020

Deadline for full submissions: March 31, 2021

an Open Access Journal by MDPI

Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
