Message from the Guest Editors

The United Nations proposed 17 Sustainable Development Goals (SDGs) in 2015 which, in recent years, have become an important indicator of the development of global issues.

In the area of industrial engineering and operations management, sustainability issues continue to receive attention from researchers, and the mechanisms, such as source reduction, recycling, and reuse, have been applied to reduce the waste of production and consumption. This trend encourages companies to adopt sustainable industrial and commercial practices. Government departments can also adopt a sustainable public procurement process to guide enterprises in green production and promote the circular economy.

The aim of this Special Issue is to provide the researchers with a room to present the innovative ideas, research, methodologies, developments and applications in the field of sustainability in Industrial Engineering and Operations Management. Topics include but are not limited to the following: sustainable production and consumption framework and model, sustainable service management, innovation for sustainability, green logistics, IoT, big data, sharing economy for sustainability, and circular economy.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
