Message from the Guest Editors

Consumers are increasingly concerned about where their food comes from and pay great attention to whether it is produced responsibly, from farm to fork. Accordingly, the sustainability of food supply chains has gained attention and recognition from scholars, practitioners, and the public as it significantly impacts the environment through greenhouse gas emissions and solid wastes. Food supply chains are complex as they include different level actors, from those who produce and aggregate to those that add value to the product (processing) and those who sell into the next level (wholesale and retail). Therefore, there remains a substantial challenge ahead for the food industry to become more sustainable. The supply chain must be smart and adopt information and digital techniques and technologies (IDTTs) to overcome sustainability challenges over time.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
