Deadline for manuscript  
submissions:

**closed (15 December 2022)**

### Message from the Guest Editors

With the development of green energy, it has become the focus of governments, research institutions, and researchers to reduce carbon emissions and promote sustainable development of energy ecology. To this end, the Internet of Things, Blockchain, Computing Power Networks, and other technologies should be integrated in order to empower traditional industries, such as energy, transportation, and manufacturing, to construct a new generation of computing paradigm "Green Trusted Computing". Additionally, it is to improve productivity and operation efficiency, realize the coordinated promotion of "carbon reduction, pollution control, green growth and growth", and promote the sustainable development of energy ecology.

In this Special Issue, original research articles and reviews are welcome. Research areas may include but are not limited to:

Key technologies of green energy prediction and scheduling for distributed energy;

Key collaborative technologies of the trans-domain twin of transport-energy-information in green transportation;

Key collaborative technologies of green economy trusted regulation.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
