Message from the Guest Editors

The present Special Issue aims to bring together projects and experiences developed in different countries to reduce interpersonal violence in its different forms and manifestations. We would also like to encourage submissions identifying relationships between interpersonal violence and SDGs, and research analyzing a wide range of risk and protective factors that should be taken into account to prevent and reduce all forms of violence. In this sense, the Special Issue will try to answer the question: how can violence elimination become a reality to achieve the SDGs?

To answer this question, all kinds of papers are welcome: conceptual, narrative reviews, systematic reviews, intervention evaluations, qualitative and quantitative studies, and experimental research. Although we encourage submissions on all manifestations of interpersonal violence, research analyzing different forms of gender-based violence is especially welcome.
