Message from the Guest Editor

Dear Colleagues,

The development of a sustainable urban sector is one of the main priorities of European governments to overcome climate change constraints. The need to increase the sustainability and energy efficiency of buildings has led to the development and implementation of innovative design criteria with special attention to the integration of renewable energies. To guarantee the sustainability dimension of these initiatives, environmental, economic and social aspects are accounted among the most relevant ones to be evaluated by life cycle approaches and multicriteria decision-making methodologies.

Papers relevant to the scope of this Special Issue include, but are not limited to, the following areas: energy communities, integration of renewable energy in urban areas, sustainability assessment of innovations based on life cycle assessment and hierarchical decision-making approaches.

I look forward to your contribution.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
