### Message from the Guest Editors

The editors of this Special Issue invite the review of life-cycle applications from both a scientific and a practical point of view, highlighting examples and case studies at a regional level. The life cycle applications should be relevant to actors from different economic sectors, as well as to public institutions responsible for regional planning and administrative procedures. Preference will be given to discussions of regional case studies, needs, actions, and outcomes that embody a life-cycle approach rather than describing individual products or business practices that are already extensively published elsewhere.
