Message from the Guest Editors

Cities are areas of economic agglomeration and of high population density. Urban production and consumption affect, not only the socioeconomic and environmental quality within cities per se, but also that in distal areas through land teleconnection channels. The effects of urban land teleconnections contribute to interactions and feedbacks between the coupled nature and human systems, both within urban areas and in distal areas. From the perspective of global sustainability, the effects of urban land teleconnection should be carefully examined and properly integrated into the policies of urban sustainability. In view of the fact that the concept of land teleconnection has been highlighted in the science plans of the core projects of the Global Land Programme (GLP) and Urbanization and Global Environmental Change (UGEC) of previous IGBP and IHDP, this Special Issue entitled “Land Teleconnection, Governance and Urban Sustainability” will focus on the subjects of land teleconnection resulting from urban production and consumption. We will explore the teleconnected influence of urbanization on distal areas.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
