Land Teleconnection, Governance and Urban Sustainability

Message from the Guest Editors

Cities are areas of economic agglomeration and of high population density. Urban production and consumption affect, not only the socioeconomic and environmental quality within cities per se, but also that in distal areas through land teleconnection channels. The effects of urban land teleconnections contribute to interactions and feedbacks between the coupled nature and human systems, both within urban areas and in distal areas. From the perspective of global sustainability, the effects of urban land teleconnection should be carefully examined and properly integrated into the policies of urban sustainability. In view of the fact that the concept of land teleconnection has been highlighted in the science plans of the core projects of the Global Land Programme (GLP) and Urbanization and Global Environmental Change (UGEC) of previous IGBP and IHDP, this Special Issue entitled “Land Teleconnection, Governance and Urban Sustainability” will focus on the subjects of land teleconnection resulting from urban production and consumption. We will explore the teleconnected influence of urbanization on distal areas.
Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2018).
