Deadline for manuscript submissions:

**20 December 2021**

### Message from the Guest Editors

It has been recognized that ecosystems and landscapes are the two main spatial units in ecological research, though their concepts often remain vague and overlap when it comes to environmental management purposes. However, the landscape perspective seems more appropriate when dealing with sustainable resource management. Therefore, this Special Issue aims at conceptualizing and discussing the effects of landscape composition and configuration on the space lived, perceived, and managed by humans, with specific reference to the provision of landscape services, taking into account the possible synergies and trade-offs among the provision of services as well as the appropriate spatiotemporal scales. The present Special Issue aims to gather a series of conceptual and empirical manuscripts highlighting that the landscape perspective represents an added value in managing natural resources and enhancing human wellbeing. Papers selected for this Special Issue will be subject to a rigorous peer review procedure with the aim of a rapid and wide dissemination of research results, developments, and applications.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
