### Message from the Guest Editors

The main objective of this Special Issue is to highlight the state of the art of the new and traditional frontiers of study and research in geomorphological and historical landscape changes, sustainable landscape planning, and soil erosion assessment, with particular focus on the historical transformations of the landscape caused by human activities. Another goal is to combine and stimulate an interdisciplinary debate on these interconnected themes and reflect the different interactions between humans and the environment, which over time have favored and induced local and global changes in the physical landscape.

Considering the current 17 goals of the 2030 Agenda for Sustainable Development, contributions regarding different geographical areas, analysis methods, and reviews of existing literature and case studies focusing on the Special Issue key themes from geomorphological, geoarcheological, and landscape architectural disciplines are strongly encouraged as well as broader overviews.

Deadline for manuscript  
submissions:

**31 January 2022**

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
